

diamond view disk

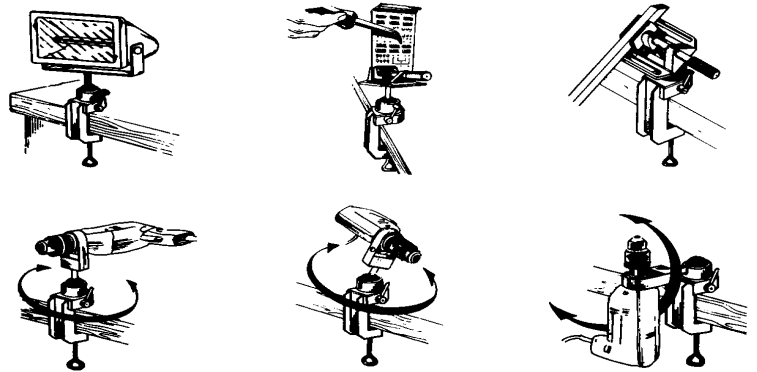

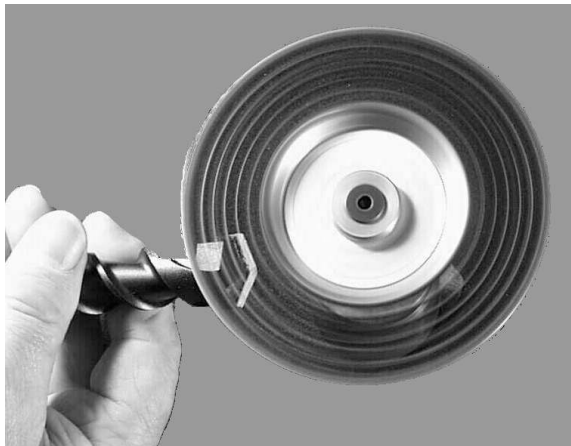

...and you'll never lose your sight!

Advantages:

- While you're grinding, you can see your work piece through the disk.
- So you can see exactly where and how much you are grinding.
- Automatically you are in the correct angle.
- You only remove as much or as little as needed.
- The diamond coating enables you to grind any material.
- The 3-sided diamond coating assures you years and years of service.
- The only 3 mm (0.12 inch) thickness of the disk enables you to grind into very narrow tools, surfaces and angels.

brilliantly simple, - simple brilliant !
